MEMO To: Professor Rose's Sociology Students From: GKG Partners

The Professor is correct, in The Third Decade, January, 1986

....This [alias OSWALD] is an important book .... (p 30)

His hedging this accolade requires that you be made fully aware of this importance. You especially; the next generation that must make this continuing crusade for truth and civility worth our while.

Send us your names and addresses and you'll receive alias O. Figure its worth to you on a scale of one to ten and translate that into a check to GKG Partners box 1465 Manchester MA 01944. Any assessment less than five may pass .... pass the book to someone who might enjoy disagreement with you.

alias OSWALD is much much more than just a book

It pays respect to Michael Eddowes' excellent start in researching height, body scars and fingerprints which all point to Oswald's imposture. Befouled by the author's KGB-agent, JFK-assassin impossibilities, alias O substitutes CIA for KGB and proves JFK-assassin fraud.

Beyond Eddowes it investigates eyes, hair, complexion, weight, build, Russian-language ability, handwriting, Marine "buddies", travel to Moscow, Marine unit/station, medical, dental and paymaster records. Exposing Coverup's hanky-panky in these areas, the false "Oswald" photos clinch Substitution by the CIA. Harry Dean's story of working with someone he knew as Oswald in the successful infiltration of the conspiracy to assassinate the President, rounds out Hidell's life, and death by double-cross.

.... this ties up a lot of loose ends about Oswald...(Jim Marrs)

One of the loosest is the 1981 exhumation of the body in the grave marked "Oswald". The exhumation team decapitated the corpse to X-ray the teeth. Comparing the 4 Oct 81 X-rays taken in Dallas,TX with the 27 Mar 58 X-rays taken in El Toro, CA,while Oswald was in the Marines, enabled the experts to conclude,

... the remains in the grave ... were indeed Lee Harvey Oswald ...
(Exhumation Report, p 33)

Oswald was in the Marines 27 Mar 58. He was serving overseas in Atsugi, Japan. The teeth X-rayed in El Toro, CA on that date were the same teeth exhumed from the grave, They were Hidell's, not Oswald's.

After four years' research and two complete re-writes, with typing virtually complete on alias O's third go-round, this extraordinary error was consummation of W R Morris's exasperation during some haggling over factual phraseology, "I'll write the story [Part I]; you prove it [Part II]".

> .... Those 27 Mar 58 X-rays, specified by the Military Personnel Records Center, St Louis, MO, as originating in El Toro, CA advocate and confirm Substitution's awful truth ....
> (p 162)

Exhumation's loss (?); alias O's gain. Hardly ever has the Truth been revealed so beautifully.

(cont'd)

MEMO concluded

Gerald Ford's Portrait of The Assassin to the contrary, researchers have known for years that Oswald did not fire a gun that Friday afternoon. His exact role has been somewhat of an enigma, which is now unraveled by not only the very words of the men who framed, killed and buried him but also by the happenstance that led W R Morris to meet Harry Dean. Understanding Substitution places the agent-impostor-infiltrator-patsy truth in sensible, believeable contradiction to the nonsensical lone-defector-assassin lie perpetrated by the conspirators, the Dallas Police, the Warren Commission and mouthed ad nauseum by the ignorant media.

The Professor is correct: alias OSWALD is an important book

Reasonable solutions tend to breed unreasonable doubts and alias O is no exception. Too many Oswalds carrying too many posters and ID cards for too many months plus unshakable faith (?) in the Warren Report's Hidell, gift-wrapped in "does it really make such a difference?", are all helpful. On their way down the drain they take the rest of the cobwebbery with them. This permits objective review of "whatever remains, no matter how improbable, must be the truth."

alias O allows you to learn for yourself that this cold-war spy story, cleverly used to coverup not only Oswald's imposture but also the JFK conspiracy, really does make a difference, particularly for those who can see the forest and the trees.

The callous, total substitution of one human being for another, no matter the cause, is a unique operation in modern warfare. It immediately brings up the question of the impostured marine, the case officers who handled both men, the surviving brothers, the surviving wife and daughters and the surviving bureaucrats who are privy to this hoax. The question of the democratic polity that orders, covers-up and lies to consummate such inhumanities in the neighborhood we all call Earth, is partially answered on the back cover:

> .... *Nous Accusons* the Executive Branch ..... with Conspiracy and Coverup in re: Alek James Hidell alias Lee Harvey Oswald....

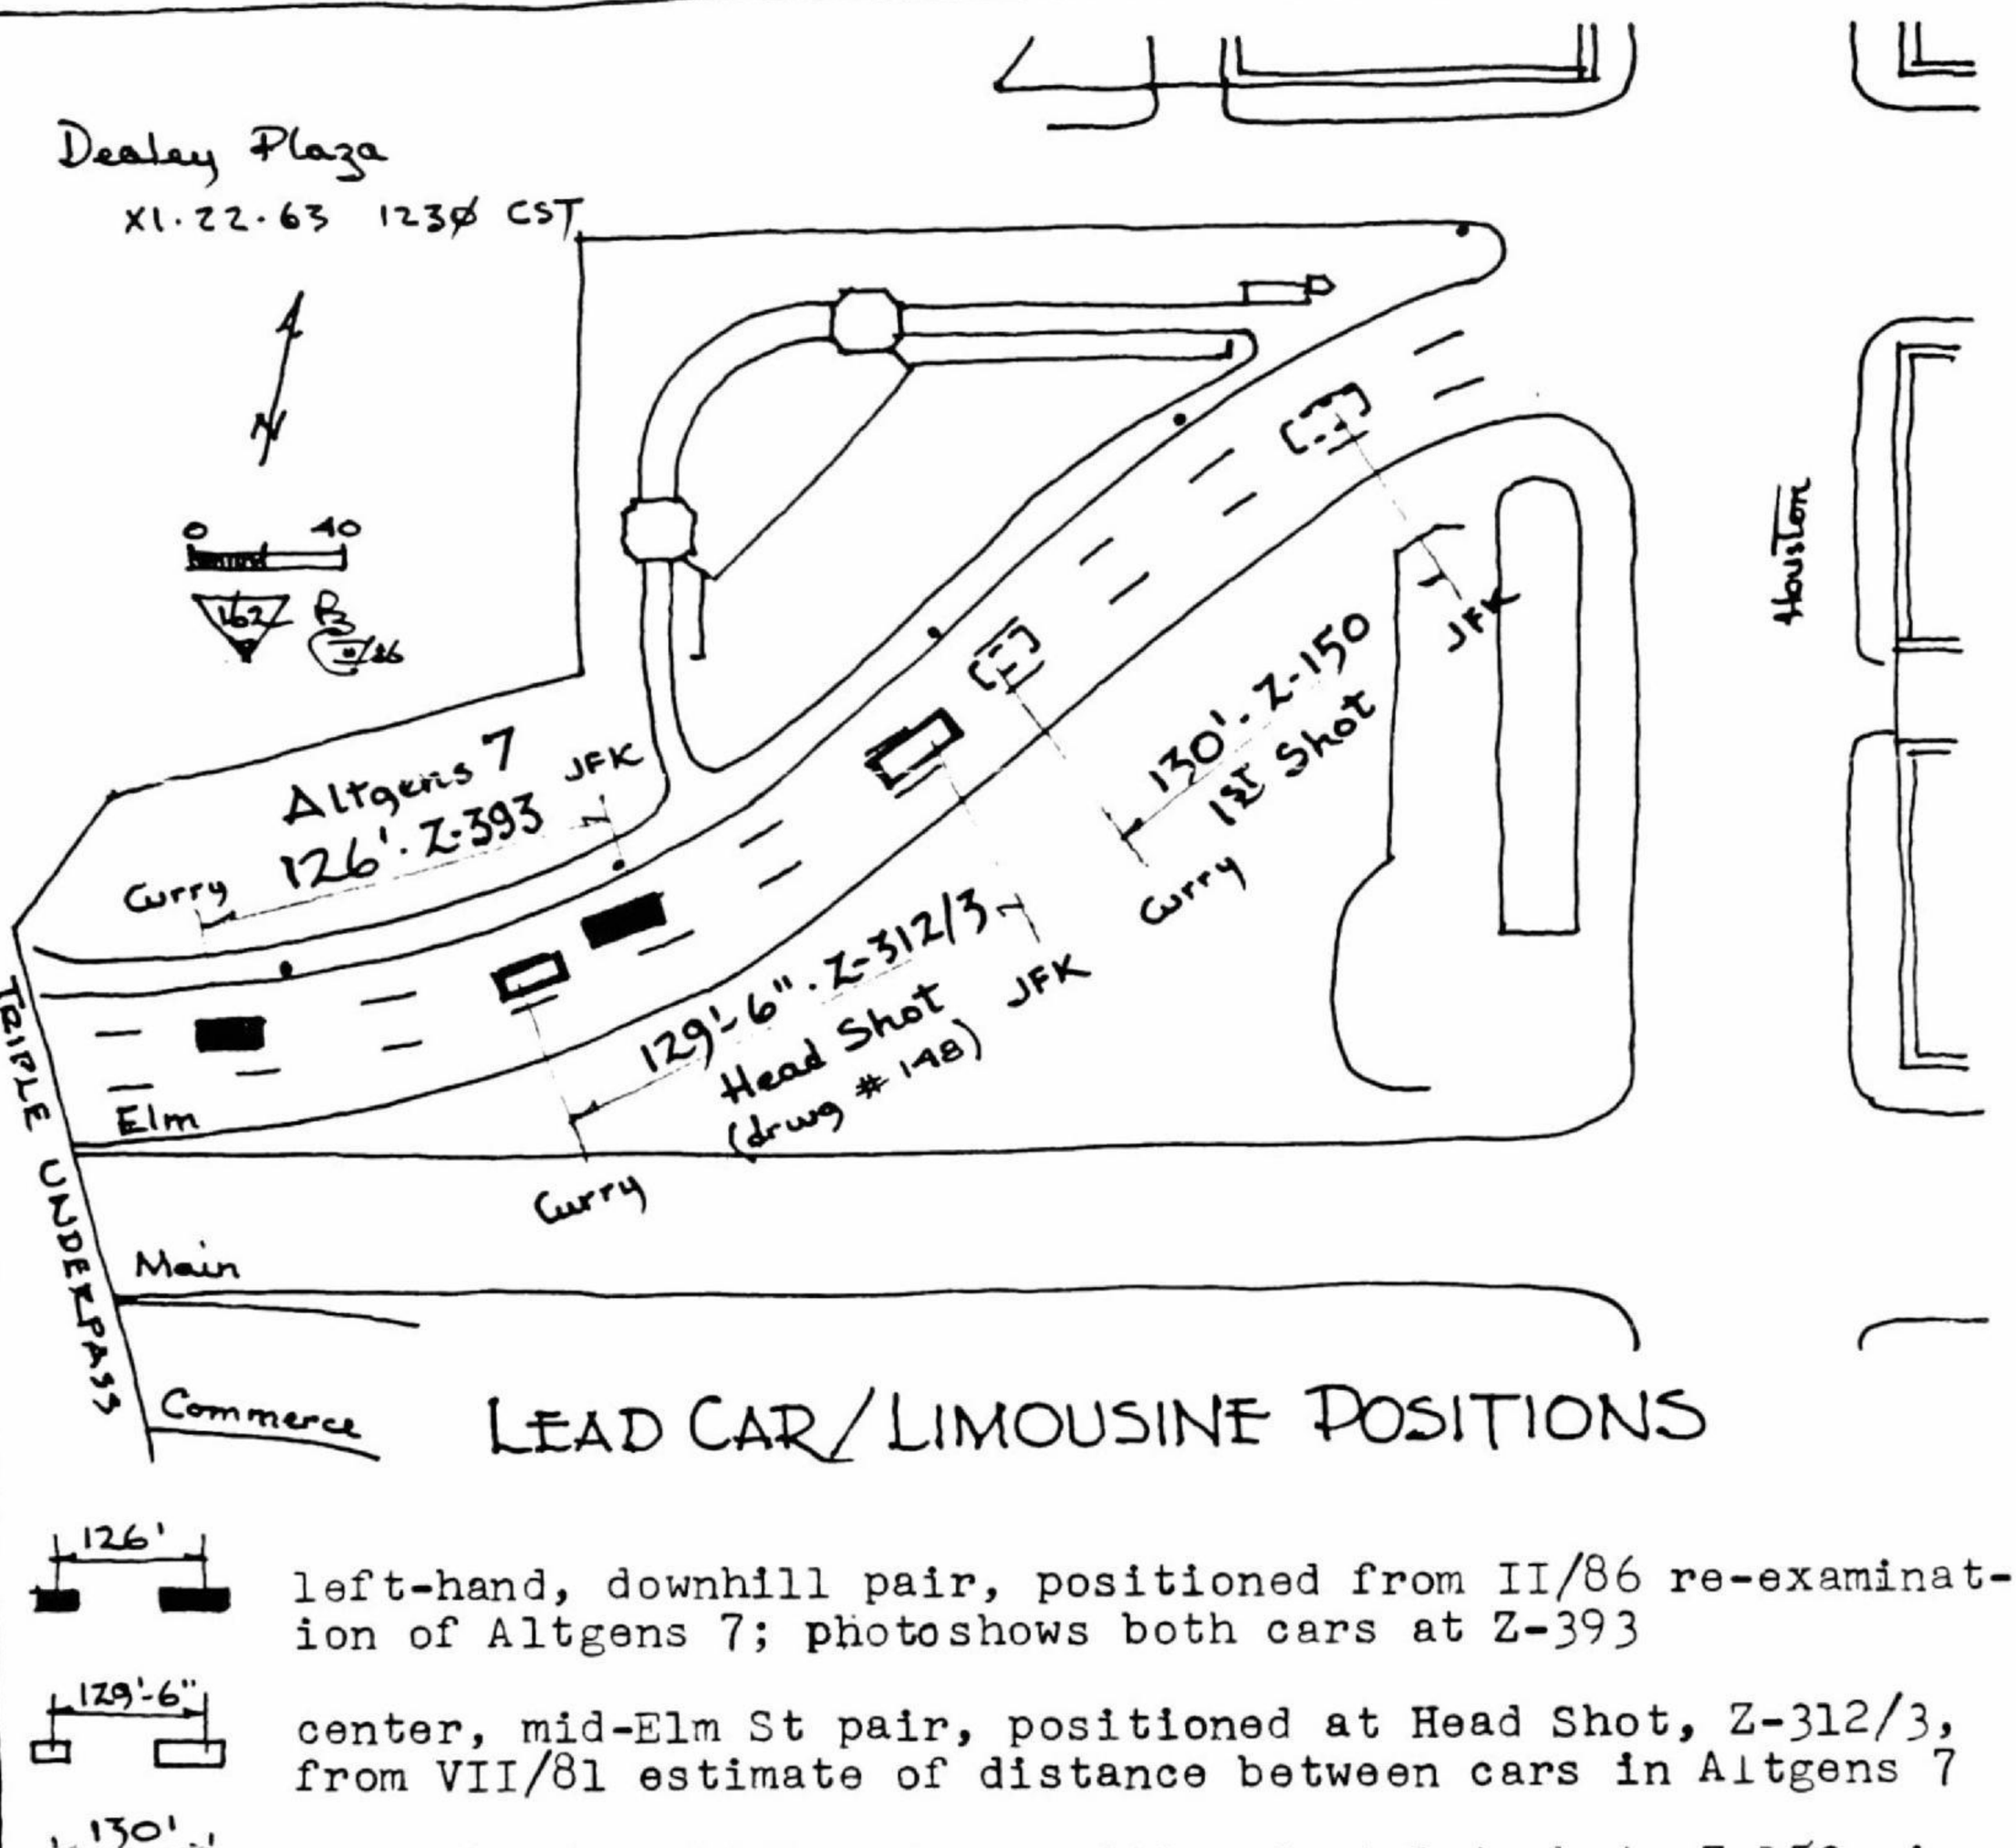
Before the Professional War Machine bombs mental hospitals in Angola and Nicaragua on its way to doing what it mis-managed to do in Grenada, we implore someone to use alias O in his favorite slingshot. Cleaning our own house of death squads and their baggage is long overdue. The change-over from bully-boy to friend will take many moons.

alias OSWALD is more than an important book. It is a watershed, a good place for the next generation to start on the trail that leads directly into the shots, wounds and scars in Dealey Plaza. We're ready when-ever you are.

> ....Dive in; it's never too late to start investigating murder.

(p/xi)

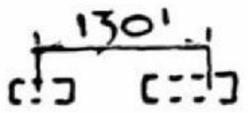
When I was a boy, I was told anyone could become President; I'm beginning to believe it. (Clarence Darrow)



LEAD CAR/LIMOUSINE POSITIONS

left-hand, downhill pair, positioned from II/86 re-examination of Altgens 7; photoshows both cars at Z-393

center, mid-Elm St pair, positioned at Head Shot, Z-312/3, from VII/81 estimate of distance between cars in Altgens 7



right-hand, uphill pair, positioned at 1st shot, Z-150, in response to following quote from W A Marsh, A Brief Rebuttal to the Ramsey Report in the January 1986 issue of The Third Decade :

> .... when .... Curry announces .... he has just reached the Triple Underpass ....We can be fairly certain that no shots have been fired yet, because the JFK limosine (sic) is still a couple of hundred yards behind the lead car carrying Curry....
> (p 16)

"a couple of hundred yards" at the first shot, puts Curry (with Sorrels, Lawson and Decker in the car too) 80 feet the other side of the Triple Underpass.

If you're outside the park you can't beat the conspirators on Elm St
